Aim: WebDriver set sampler script in JMeter.

First, we can create the thread group and add the jp@gc chrome Driver.

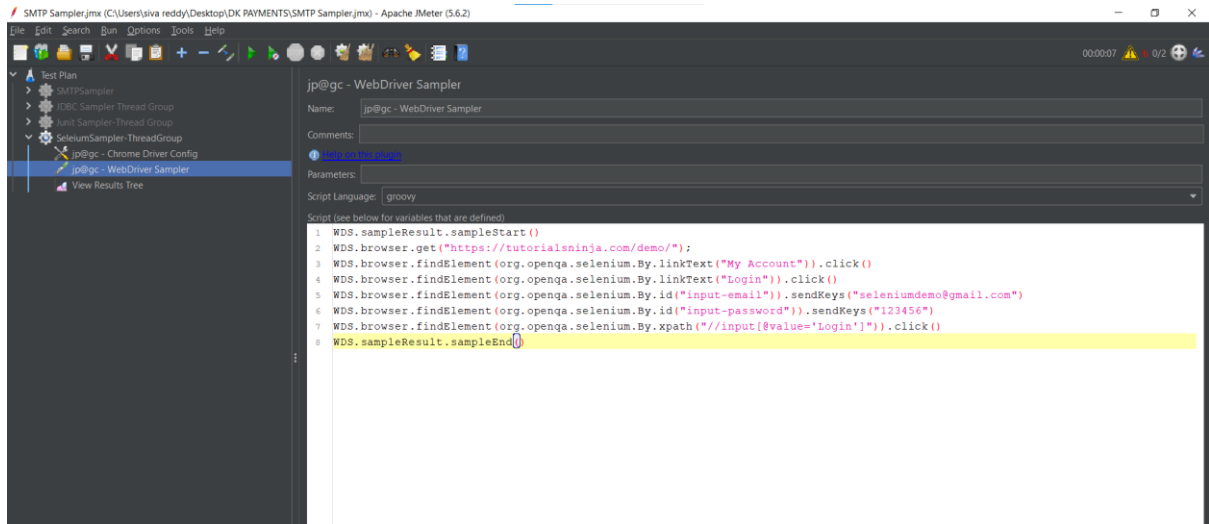

After that we can add the jp@gc web driver Sampler

Now we can use the web driver code to enter the jp@gc web driver sampler

```
WDS.sampleResult.sampleStart()
WDS.browser.get("https://tutorialsninja.com/demo/");
WDS.browser.findElement(org.openqa.selenium.By.linkText("My
Account")).click()
WDS.browser.findElement(org.openqa.selenium.By.linkText("Login")).click()
WDS.browser.findElement(org.openqa.selenium.By.id("input-
email")).sendKeys("seleniumdemo@gmail.com")
WDS.browser.findElement(org.openqa.selenium.By.id("input-
password")).sendKeys("123456")
WDS.browser.findElement(org.openqa.selenium.By.xpath("//input[@value='Login
']")).click()
WDS.sampleResult.sampleEnd()
```

Now we can execute the jp@gc web driver sampler.

We can see the result in view results tree.

OUTPUTS:

Open the chrome driver.
